

DAT16 SF: HOMEWORK 1 ASSIGNMENT

Assigned: Wednesday, July 29, 2015

Due: Monday, August 3, 2015, before class

Review Due: Wednesday, August 5, 2015, before class

The purpose of this homework is to review what we've learned about git and github

HOMEWORK QUESTIONS

DUE MONDAY:

1. Check the status of your repo
2. Pull from instructor to get the most recent changes
3. Create a folder called Final Project and a file called Readme.md inside it
4. In the Readme.md write a couple of lines about yourself and an interest of yours
5. Review all changes in the repo using the appropriate commands (status, diff)
6. Commit all changes to your local repo
7. Push committed changes to your personal remote
8. Verify that the status is clean
9. Go to your github repo page and find a way to enable issues
10. Open a test issue in your repo, leave a comment and close it

BONUS POINTS:

If you are tired of typing username and password you can configure ssh keys to connect to Github as explained here:

<https://help.github.com/articles/generating-ssh-keys/>

DUE WEDNESDAY:

1. Go to your assigned review-buddy's repo
2. Open an issue in his repo, writing a couple comments on your review-buddy's Readme.md file
3. Find a way to quote the instructors in the comments so that we get notified about the open issue
